Md Jaker Ullah Chowdhury Nahin

Software Quality Assurance Engineer · 1.7+ Years Experience

Phone: +880 1633-518042 · **Email:** nahinchowdhuryfci@gmail.com · **Location:** Dhaka, Bangladesh
Portfolio: Portfolio · **GitHub:** GitHub

PROFESSIONAL SUMMARY

Dedicated Software Quality Assurance Engineer with **1.7+ years of hands-on experience** spanning functional, regression, and smoke testing across web applications, CMS panels, and enterprise ERPs. Extensive expertise in **REST API contract testing in Postman** against OpenAPI/Swagger specifications and building automated test suites with **Python, Pytest, Requests, and Selenium 4 (Page Object Model)**. Experienced in JMeter/k6 concurrency load testing (500 VUs), PostgreSQL database validation, synthetic test data generation via Pandas, and disciplined STLC defect triage lifecycles.

CORE TECHNICAL COMPETENCIES

Test Automation:	Selenium 4, Python 3.14, Pytest, Page Object Model (POM), Requests, ReportLab, pytest-html
API & Contract Testing:	Postman, Swagger / OpenAPI 3.0, REST APIs, JSON Schema Validation, Newman CLI, Single-Session JWT Auth
Manual QA & STLC:	Functional, Regression, Smoke, Sanity, UAT, Exploratory, Boundary Value Analysis (BVA), Equivalence Partitioning, Bug Lifecycle
Performance & Security:	JMeter, k6 Concurrency Testing (500 VUs, 1,840 req/sec), RBAC Permission Gating, JWT 401 Unauthorized Gates
Data & Databases:	PostgreSQL, SQL queries, Pandas, NumPy, bulk synthetic CSV/Excel test data pipelines
Process & Tools:	Git, GitHub, Jira defect tracking, Agile / Scrum sprint cadence, daily QA execution status reports

PROFESSIONAL EXPERIENCE

Associate QA Engineer
Sep 2025 – Present (Full-time)

Skytech Solutions, Software Wing (Codezzi) · Dhaka, Bangladesh

- Execute full functional, regression, smoke, and sanity test gates across 10+ company products, client platforms, and CMS panels before each release.
- Validate REST APIs in Postman against Swagger documentation: response payloads, mandatory keys, data types, JWT tokens, HTTP status matrices (200, 201, 400, 401, 403, 422), and negative boundary conditions.
- Authored a robust Pytest automation suite for the SkyVAT REST API covering **169 endpoints across 46 modules** with single-session token caching, unified request clients, and HTML reporting.
- Built Selenium 4 E2E automation for **Codezzi Hiring Desk (ATS)** across 13 admin pages (93 tests) with dynamic ATS CV generation and SMTP email verification.
- Document bugs with reproducible steps, expected vs. actual outputs, network HAR logs, and screenshots; retest developer hotfixes and send daily QA status reports to leadership.

Junior Executive, Software QA
Apr 2024 – Jul 2024 (Internship)

Ignite Technology · Dhaka, Bangladesh

- Performed functional and User Acceptance Testing (UAT) on hospital ERP across core patient admission, billing, and pharmacy modules.
- Authored 120+ structured test cases, logged UI and workflow defects in Jira, and verified fixes with developer teams.
- Supported hospital operational staff in onboarding the ERP and communicated user friction points to the engineering team.

FEATURED AUTOMATION PROJECTS

SkyVAT API Test Automation Suite · Python · Pytest · Requests · pytest-html
github.com/nahincodezzi/api_automation

- Automated **169 REST API endpoints across 46 ERP modules**, replacing hours of repetitive manual checks and achieving 1.48s execution duration.
- Implemented single-session JWT auth handshake, automated 401 gates for expired/missing tokens, response schema verification, and boundary pagination limits.
- Created custom Swagger-to-CSV parser script to audit API documentation against test execution matrix, ensuring 100% test coverage.

Codezzi Hiring Desk E2E Automation · Selenium 4 · Pytest · Page Object Model
93 Tests · 100% Pass · 9 Bugs Tracked

- Developed full Page Object Model (POM) architecture covering **13 admin pages**, automating position setup, candidate intake, and pipeline gating.
- Built dynamic ATS CV factory with ReportLab generating custom PDF/DOCX resumes on-the-fly to validate candidate parser accuracy.
- Automated SMTP notification email delivery checks and cross-page metric reconciliation between dashboard and recruitment pipeline.

ENTERPRISE PRODUCTS & CLIENT PLATFORMS TESTED

SkyVAT: NBR-compliant VAT ERP; purchase, sales, returns, inventory, stock transfer, BOM production, Mushak 6.1/6.3 registers, multi-branch RBAC isolation.

SkyCRM: Workforce management; employee bulk upload, work assignments, attendance, leave, campaigns, accounts, and role-based access.

SkySMS: SMS gateway; OTP dispatch queues, transactional messaging, account balance ledgers, and Postman API contract suites.

SkyDataManager: Bulk data processing; Excel/CSV validation rules, deduplication engine, and asynchronous background worker queues.

Codezzi Hiring Desk: Applicant tracking system; recruitment pipeline, talent pool, candidate evaluations, email templates, and SMTP logs.

Prime Bank Foundation: 4 institutional websites + CMS portals and online Research Grant Portal with multi-stage review workflows.

Bangladesh Athletics Federation: Bilingual (Bangla & English) national sports portal, event registration, and ranking records.

AI Google Ads Manager & Corporate: Search/Display campaign builders and Codezzi live corporate CMS platform.

EDUCATION

B.Sc. in Computer Science & Engineering	*Bangladesh University of Business & Technology (BUBT)*	**CGPA: 3.35 / 4.00**
Diploma in Engineering, Telecommunication	*Feni Computer Institute (FCI)*	**CGPA: 3.18 / 4.00**
Secondary School Certificate (SSC), Science	*Shaheen Academy School & College*	**GPA: 5.00 / 5.00**

CERTIFICATIONS, TRAINING & REFERENCES

Professional Training & Certifications:

- DA & DS Job Ready Program using Python
- Python and SQL for Working with Data
- Cloud Computing with Oracle APEX
- Data Science & Machine Learning Training

Languages: Bengali (Native), English (Professional)
