Md Jaker Ullah Chowdhury Nahin

Software Quality Assurance Engineer · 1.7+ Years Experience

Phone: +880 1633-518042 · **Email:** nahinchowdhuryfci@gmail.com · **Location:** Dhaka, Bangladesh
GitHub: github.com/nahincodezzi · **Portfolio:** Portfolio

PROFILE / PROFESSIONAL SUMMARY

Dedicated SQA Engineer with **1.7+ years of hands-on experience** spanning functional, regression, and smoke testing across client websites, CMS platforms, and multi-tenant enterprise ERPs at Skytech Solutions (Codezzi). Specialized in **REST API contract validation in Postman** against Swagger/OpenAPI docs, building automated test suites with **Python, Pytest, Requests, and Selenium 4 (Page Object Model)**, performing concurrency load benchmarks with JMeter and k6 (500 VUs), PostgreSQL ledger verification, and disciplined STLC defect triage.

CORE TECHNICAL SKILLS

Manual QA:	Functional, regression, smoke, sanity, UAT, exploratory; boundary value analysis (BVA), equivalence partitioning, UI/forms/CMS testing.
API Testing:	Postman, Swagger (OpenAPI 3.0), REST APIs; JSON Schema validation, single-session JWT auth handshakes, status code matrices, Newman CLI.
Automation:	Selenium 4 (Page Object Model), Python 3.14, Pytest, Requests client, ReportLab ATS test CV generator, pytest-html execution reports.
Performance & DB:	k6 & JMeter concurrency load testing (500 VUs, 1,840 req/sec), PostgreSQL, SQL queries, Pandas & NumPy synthetic test data pipelines.
Process & Tools:	Git, GitHub, Jira bug lifecycles, Agile/Scrum sprint cadence, daily QA execution status reports, test plan & scenario design.

PROFESSIONAL EXPERIENCE

Associate QA Engineer — Sep 2025 – Present (Full-time)

Skytech Solutions, Software Wing (Codezzi) · Dhaka, Bangladesh

- Execute functional, regression, smoke, and sanity test gates across 10+ company products, client websites, and CMS portals before each production release.
- Validate REST APIs in Postman against Swagger docs: response payloads, mandatory fields, status code matrices (200, 201, 400, 401, 403, 422), tokens, and negative boundary conditions.
- Built an automated Pytest test suite for SkyVAT REST API covering **169 endpoints across 46 modules** with single-session JWT auth, reducing manual testing time by 65%.
- Developed Selenium 4 Page Object Model (POM) E2E automation for **Codezzi Hiring Desk (ATS)** covering 93 tests across 13 admin pages with dynamic ATS CV generation and SMTP email status checks.
- Document bugs with reproducible steps, expected vs. actual results, network logs, and screenshots; retest fixes with developers and publish daily QA status reports.

Junior Executive, Software QA — Apr 2024 – Jul 2024 (Internship)

Ignite Technology · Dhaka, Bangladesh

- Performed functional and User Acceptance Testing (UAT) on hospital management ERP across core patient admission, doctor scheduling, and pharmacy modules.
- Authored 120+ structured test cases, logged defects in Jira, verified bug fixes with developers, and assisted hospital staff in user onboarding.

TEST AUTOMATION PROJECTS

SkyVAT API Test Automation Suite — GitHub: github.com/nahincodezzi/api_automation

Python · Pytest · Requests Client · pytest-html Reports · OpenAPI 3.0

- Architected a robust Pytest suite for SkyVAT REST API covering **169 endpoints across 46 modules**, executing complete regression in 1.48 seconds.
- Implemented single-session JWT auth, automated 401 gates for missing/expired tokens, JSON schema validation, and Swagger-to-CSV parser script ensuring 100% test alignment.

Codezzi Hiring Desk E2E Automation Framework — GitHub: github.com/nahincodezzi

Selenium 4 · Python 3.14 · Pytest · Page Object Model (POM) · ReportLab Factory

- Automated full recruitment lifecycle covering **93 test cases across 13 admin pages**, dynamic ATS CV generation (ReportLab), and SMTP email status checks.
- Maintained strict xfail defect tracking for 9 identified production issues and verified cross-page metric reconciliation across dashboard views.

ENTERPRISE PRODUCTS & CLIENT PLATFORMS TESTED

SkyVAT · VAT & Business Management ERP
- Validated purchase, sales, returns, stock transfers, and bill of materials (BOM) production flows.
- Verified NBR Mushak forms (6.1, 6.3, 9.1), automated tax deduction at source (VDS), and branch RBAC.

SkyCRM · Workforce & Customer Management
- Tested employee bulk upload, work assignments, daily reports, attendance, and leave approval workflows.
- Verified customer campaign tracking, accounts dashboards, and role-based access permissions.

SkySMS · SMS & OTP Transactional Gateway
- Validated single and bulk transactional SMS dispatch, automated OTP queues, and customer account ledgers.
- Executed Postman API testing for auth tokens, request payload validation, status codes, and error recovery.

SkyDataManager · Bulk Data Processing & ETL
- Tested bulk Excel/CSV import and export, data validation rules, duplicate detection, and background queues.
- Verified async background jobs, real-time status notifications, and live execution logs.

Codezzi Hiring Desk · Applicant Tracking System
- Tested recruitment pipeline, candidate intake, talent pool, interview scheduling, and email templates.
- Verified automated notification email dispatch across 5 recruitment stages and pipeline metrics.

Prime Bank Foundation · 4 Websites, CMS & Grant Portal
- Verified 4 institutional web portals (Foundation, Eye Hospital, Nursing College, School) and CMS consoles.
- Tested Research Grant Portal application intake, multi-stage reviewer evaluations, and approval alerts.

Bangladesh Athletics Federation · Bilingual Platform
- Tested bilingual (Bangla & English) athlete profiles, event registrations, national record tracking, and rankings.
- Verified athlete age verification rules, competition registration forms, and CMS publishing.

AI-Powered Google Ads Manager · Campaign Suite
- Tested campaign wizards for Search, Display, and Performance Max; verified bidding, keywords, and budgets.
- Validated field level input boundaries and agency vs. self-managed workspace modes.

Codezzi Corporate Website · Company Portal & CMS
- Tested public client-facing pages, interactive contact forms, and CMS administration for services and blog.
- Verified responsiveness, form validations, SEO meta tags, and live CMS updates.

Hospital Management ERP · Ignite Technology
- Performed functional and User Acceptance Testing (UAT) across core patient, doctor, and pharmacy modules.
- Verified billing calculations, medicine stock updates, and report generation accuracy.

EDUCATION

B.Sc. in Computer Science & Engineering	*Bangladesh University of Business & Technology (BUBT)*	**CGPA: 3.35 / 4.00**
Diploma in Engineering, Telecommunication Technology	*Feni Computer Institute (FCI)*	**CGPA: 3.18 / 4.00**
Secondary School Certificate (SSC), Science	*Shaheen Academy School & College*	**GPA: 5.00 / 5.00**

CERTIFICATIONS & TECHNICAL TRAINING

- **Data Analytics & Data Science Job Ready Program** using Python
- **Python and SQL for Working with Data**
- **Cloud Computing with Oracle APEX**
- **Data Science & Machine Learning Professional Training**

Languages: Bengali (Native) · English (Professional Working Proficiency)
