PROFILE

SQA Engineer with a Computer Science background, working as an Associate QA Engineer at Skytech Solutions (Codezzi). I test web products, client websites and CMS panels through functional, regression and smoke testing, and validate REST APIs in Postman against Swagger docs. I write clear test cases and bug reports developers can act on quickly, and I am building a Python + Pytest suite for the SkyVAT API (169 endpoints across 46 modules).

CORE SKILLS

Manual Testing	Functional, regression, smoke, sanity, UAT, exploratory; UI, form and CMS testing
API Testing	Postman, Swagger (OpenAPI), REST APIs; CRUD, validation, authentication, status codes, error handling
Automation	Python, Pytest, Requests, pytest-html
Data & SQL	SQL, Pandas, NumPy; preparing and validating bulk CSV/Excel test data
Process & Tools	STLC, Agile, test case design, bug reporting, defect tracking, retesting, QA reporting, Git, GitHub

PROFESSIONAL EXPERIENCE

Associate QA Engineer

Sep 2025 – Present

Skytech Solutions, Software Wing (Codezzi) · Dhaka

- Run functional, regression, smoke and sanity tests on company products, client websites and CMS panels before each release.
- Test REST APIs in Postman against Swagger docs: response data, required fields, input validation, tokens, status codes and negative cases.
- Write test cases and log bugs with clear steps, expected vs. actual results and screenshots, then retest every fix.
- Work with developers through each release cycle and send a daily QA status report to the team.
- Automating repeated SkyVAT API checks with Python and Pytest; prepare bulk test data with Pandas.

Junior Executive, Software QA (Intern)

Apr 2024 – Jul 2024

Ignite Technology · Dhaka

- Performed functional and user acceptance testing on a hospital ERP across its core modules.
- Wrote and executed test cases, logged UI and functional bugs, and verified fixes with developers.
- Supported hospital staff in using the system and passed their feedback to the product team.

AUTOMATION PROJECT

SkyVAT API Automation

Python · Pytest · Requests · pytest-html

github.com/nahincodezzi/api_automation

- Built a Pytest suite for the SkyVAT REST API (169 endpoints across 46 modules) to replace manual Postman checks.
- Single login per run, shared request client, settings from a .env file and an HTML test report.
- Covers login and token handling (401 on missing/invalid token), response fields, pagination and GET endpoints.
- Wrote scripts that convert the Swagger file into a CSV endpoint list to plan coverage by module.

PRODUCTS TESTED

SkyVAT · VAT & business management

Purchase, sales, returns, inventory, stock transfer and production (BOM) flows; VAT per transaction; Mushak forms, registers and VAT returns; branch data isolation and role permissions.

SkyCRM · CRM & workforce management

Employee records and bulk upload, work assignments, daily reports, attendance and leave; campaigns, accounts, dashboards and role-based access.

SkySMS · SMS gateway
Bulk and single SMS, OTP and transactional messages, customer accounts; SMS APIs in Postman for auth, validation, status codes and errors.

SkyDataManager · Bulk data processing
Excel/CSV import and export, validation rules, duplicate detection, background jobs, job reports and live notifications.

Codezzi Hiring Desk · Applicant tracking system
Dashboard, hiring pipeline, candidate records, talent pool, interview scheduling, email templates and logs.

AI-Powered Google Ads Manager · Campaign management
Full campaign builder for Search, Display and Performance Max; bidding, keywords, ads, budget, field validation; agency and self-managed modes.

Prime Bank Foundation · 4 websites + CMS, grant portal
Foundation, eye hospital, nursing college and school sites and their CMS; Research Grant Portal sign-up, applications, multi-stage review and notifications.

Bangladesh Athletics Federation · Bilingual site + CMS
Athlete profiles, events, competitions, national records and rankings in Bangla and English; registration flows and admin roles.

Codezzi Corporate Website · Company site + CMS
All public pages and forms; CMS for services, portfolio, team, job posts and blog, verified on the live site.

Hospital ERP · Ignite Technology
Functional and user acceptance testing across core hospital modules.

EDUCATION

B.Sc. in Computer Science and Engineering — Bangladesh University of Business and Technology — CGPA 3.35 / 4.00

Diploma in Engineering, Telecommunication Technology — Feni Computer Institute — CGPA 3.18 / 4.00

SSC, Science — Shaheen Academy School and College — GPA 5.00 / 5.00

CERTIFICATIONS & TRAINING

- DA & DS Job Ready Program using Python
- Python and SQL for Working with Data
- Cloud Computing with Oracle APEX
- Data Science and Machine Learning Training

LANGUAGES

Bengali — Native
English — Professional proficiency
