PROFILE

QA engineer with a background in Computer Science, currently working as an Associate QA Engineer at Skytech Solutions (Codezzi). I test the company's web products, client websites and their CMS panels, covering functional, regression and smoke testing in the browser and REST API testing in Postman using the Swagger docs. I write test cases and bug reports that developers can act on quickly, and I have started automating our repeated API checks with Python and Pytest. Before Codezzi, I tested a hospital ERP during my internship at Ignite Technology.

CORE SKILLS

Manual Testing	Functional, regression, smoke, sanity, UAT, exploratory; UI, form and CMS testing; STLC, Agile
API Testing	Postman, Swagger (OpenAPI), REST APIs; CRUD, validation, authentication, status codes, errors
Automation	Python, Pytest, Requests, pytest-html
Data	SQL, Pandas, NumPy; preparing and checking bulk CSV/Excel test data
Tools & Practice	Test case design, bug reporting, defect tracking, retesting, daily QA reporting, Git and GitHub

PROFESSIONAL EXPERIENCE

Associate QA Engineer
Sep 2026 – Present

Skytech Solutions, Software Wing (Codezzi) · Dhaka

- Run functional, regression, smoke and sanity tests on Codezzi's products, client websites and their CMS panels before each release.
- Test REST APIs in **Postman** against the **Swagger** docs, checking response data, required fields, input validation, tokens, status codes and negative cases.
- Write test cases and log bugs with clear steps, expected and actual results, and screenshots, then retest each fix.
- Work day to day with developers during each release and send a daily QA status update to the team.
- Started automating repeated SkyVAT API checks with **Python and Pytest**, and use **Pandas** to prepare bulk test data.

Junior Executive, Software QA (Intern)
Apr 2024 – Jul 2024

Ignite Technology · Dhaka

- Tested a **hospital ERP** across its core modules, doing functional and user acceptance testing.
- Wrote and ran test cases, logged UI and functional bugs, and confirmed fixes with the developers.
- Helped hospital staff use the system and passed their feedback on to the product team.

PRODUCTS TESTED

Skytech Solutions · Codezzi

SkyVAT VAT and business management software

- Tested purchase, sales, returns, inventory, stock transfer and production (BOM/recipe) flows, and checked the VAT worked out on each transaction.
- Matched Mushak forms, purchase and sales registers, and VAT return figures against the transactions behind them.
- Checked that companies and branches only see their own data and that each role gets the right permissions; covered the APIs in Postman and Pytest.

SkyCRM CRM and workforce management

- Covered employee records and bulk upload, work assignments, daily work reports, attendance and leave.
- Covered campaigns, accounts and transactions, dashboards and role-based access.

SkySMS SMS gateway

- Tested bulk and single SMS, OTP and transactional messages, and customer accounts.
- Checked the SMS APIs in Postman for authentication, request validation, status codes and error messages.

SkyDataManager Bulk data processing

- Verified Excel/CSV import and export, validation rules and duplicate detection.
- Checked background jobs, job reports and live notifications.

Codezzi Hiring Desk Applicant tracking system

- Worked through the dashboard, hiring pipeline, candidate records, talent pool and interview scheduling.
- Checked email templates and email logs, and suggested improvements along with bug reports.

AI-Powered Google Ads Manager Ad campaign management

- Went through every step of the campaign builder: campaign details, bidding, settings, keywords, ads and asset groups, budget and review.
- Covered Search, Display and Performance Max campaigns, field validation, and agency and self-managed modes.

Prime Bank Foundation Four websites with CMS, plus a grant portal

- Tested the foundation, eye hospital, nursing college and school websites for navigation, content, forms and layout.
- Tested each **CMS**: adding, editing, publishing and removing pages, news, events, programmes, galleries and reports, then checking the live site.
- Checked the Research Grant Portal: sign-up, applications and drafts, multi-stage review and notifications.

Bangladesh Athletics Federation (BAF) Bangla/English website with CMS

- Tested athlete profiles, events, competitions, national records, rankings, affiliated organisations, news and media in Bangla and English.
- Verified the portal and **CMS**: athlete and competition registration, updating events, records and news, admin roles.

Codezzi Corporate Website Company website with CMS

- Went through every public page, from Home and Services to Our Works, Careers and Contact, plus the forms.
- Tested the **CMS** for services, portfolio projects, team members, job posts and blog posts, checking each change on the live site.

AUTOMATION PROJECT

github.com/nahincodezzi/api_automation

SkyVAT API Automation Python · Pytest · Requests · pytest-html

- Built a Pytest suite for the SkyVAT REST API (169 endpoints across 46 modules) to replace checks I was repeating by hand in Postman. It logs in once per run, shares one request client, reads settings from a .env file and produces an HTML report.
- Tests cover login and token handling (401 on a missing or invalid token), response fields, pagination and a list of GET endpoints. Small scripts turn the Swagger file into a CSV list of endpoints so coverage can be planned by module.

EDUCATION

B.Sc. in Computer Science and Engineering, Bangladesh University of Business and Technology — **CGPA 3.35 / 4.00**

Diploma in Engineering, Telecommunication Technology, Feni Computer Institute — **CGPA 3.18 / 4.00**

SSC, Science, Shaheen Academy School and College — **GPA 5.00 / 5.00**

CERTIFICATIONS

DA & DS Job Ready Program using Python
Python and SQL for working with data

Cloud Computing with Oracle APEX

Data Science and Machine Learning Training

LANGUAGES

Bengali: native · **English:** professional proficiency
